

Country Commons Newsletter--July 2023

NEWS: The board has installed two new lights to improve the lighting on the hillside leading out to 22a, and the motion-activated garage lights are almost all installed.

The yard work has been expanding exponentially.***

KUDOS: to Jim and Carole H. for cleaning up the Garage 4 garden AND trimming the lower branches off the tree nearby. A big job!! see photo--

***For now it is still ok to clear brush but not put into the center area according to Ryan. Other plans are in the works for taking care of the brush already gathered...

The Grounds Crew Committee plans to meet on June 30th at 5pm to do a walkabout. Anyone is welcome to participate. We will meet at the upper mailboxes.

REMEMBER the 10 mph Speed limit! There are children and maybe some other people who cannot hear you coming!

REMEMBER also that the exit onto 22a is one-way out and must not be used to enter Country Commons! Cars have been observed coming into the community that way, which is a danger (and illegal). Cars have also been seen speeding out of that exit.

COMPOSTING: We are exclusively using the bins near building 6. A friendly reminder – don't put in avocado pits or peels, as they take a long time to compost. And cutting up large items such as banana peels will help. 😊

Recyclables: There is a list on the CC website on how to handle them. Mike D will be happy to show you a very fast way to break down boxes!! Just ask him.
